

## Adjustable dock bumper RBM

The Loading Systems adjustable dock bumper RBM is a vertical moving dock bumper for extra protection of the loading bay.

### Features

- Follows the upward and downward movement of the truck
- Prevents damage to loading and unloading platforms and vehicles
- Supplied with dock bumper RB500
- Deliverable in RAL 9005 or galvanised finish

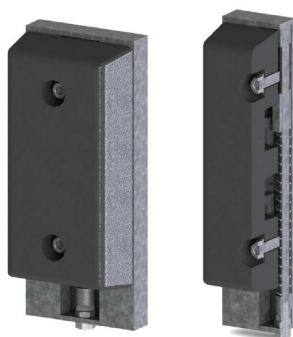

### Materials

The RBM adjustable dock bumper is built from a sturdy steel base assembly and a standard rubber bumper block. These dock bumpers are suitable for dock levellers with a hinged or telescopic lip.

The RBM adjustable dock bumper is pre-assembled and can be ordered in RAL 9005 (standard) or galvanised finish (option).

### Mobile rubber bumper RBM 500

The mobile rubber bumper RBM 500 is a standard sized adjustable dock bumper, based on a 500 x 250 x 100 mm rubber bumper block.

Article number	Dimensions WxHxD (mm)	Weight per pair (kg)	Working range
912-650	250x600x160	75	+80 / -120 mm

### Protection plate

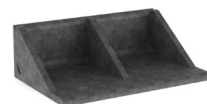

The protection plate is suitable for intensive use of the adjustable dock bumper.

Article number	Dimensions WxHxD (mm)	Weight per pair (kg)	Suitable for
912-715	230x470x15	18	912-650

### Options

With the mounting console the dock bumper can be placed 100 mm above platform level.

The adjustable dock bumper, protection plate and console can be ordered in a galvanised finish as an option.

Article number	Dimensions WxHxD (mm)	Weight per pair (kg)	Suitable for
912-760	250x80x160	14	912-650
