

Safety mirrors

The new, sustainable Loading Systems safety mirrors provide optimal safety around your loading and unloading area.

Features

- Diameter 490 mm
- Highly weatherproof
- Highly impact resistant
- Easy to install
- Available for indoor and outdoor use
- Available from stock

Application

The Loading Systems safety mirrors can be easily installed in every place with limited visibility and at risk of accidental collisions, inside or outside.

Thanks to the properties of stainless steel and high-quality production, the safety mirror is incredibly impact resistant and weatherproof. It is the ideal solution for locations with increased risk of vandalism or applies to industries where aggressive chemical atmosphere prevails.

The safety mirror is virtually unbreakable and require minimal maintenance.

Materials

The lens of the mirror and the rear plate are manufactured from a high-grade stainless steel. Around the mirror, an UV resistant PVC protective ring is mounted. The outdoor version has a screen from UV resistant PC. The separate mounting brackets are made of aluminium.

Models

This safety mirror has a diameter of 490 mm and can be supplied in a version for indoor use (965-080) or for outdoor use (965-081).

Article number	Size	Lens thickn	Back thickn	Sun screen	Weight
965-080	490	0.5	0.8	No	2,5 kg
965-081	490	0.7	0.7	Yes	3,5 kg

All dimensions are in mm.
